

SANTONI

Stand-alone dust collector

Special purpose dust collector

Wood working dust collector

Wet scrubber

Centrifugal Blower

Cyclone dust collector

Micro dust collector

APPLICATIONS
Wood/furniture mfg.
PVC pipes & profiles
Boilers/Furnaces
Jewelry manufacturing
Rubber molding
Brake-shoe/Clutch facing
Aluminum Die Casting
PCB manufacturing
Auto components
CNC workstations
Grinders -
surface/cylindrical
Auto-lathes
Auto-electric
Power paint
Paints/pigments/dyes
Insulators
Spinning/weaving
Knitting/embroidry
Mining /Minerals
Chemicals/pesticides
Ayurvedic/hair dye/talcum
Leather
Sports goods mfg.
Glass
Food/agri-products
Electroplating
Ambient air
Air Pollution Control
Pneumatic Conveying
Silo ventilation filters
Industrial Kitchens

Cartridge Filter System

Reverse Pulse Bag Filter System

Ducts

**DUST
COLLECTION**

**FUME
COLLECTION**

Is this how you operate?

Would you not rather operate like this

A complete range of air pollution control solutions are offered by SANTONI.

Whatever be your objectives SANTONI has the professional answers:

- Air pollution control.
- Prevention of dust entering your premises.
- Collection of dust generated within your premises.
- Recovery of expensive materials.
- Removal of wastes.
- Protection of products from effects of dust/fumes.
- Protection of production equipment from effects of dust/fumes.
- Eliminating exposure to toxic materials.
- Handling of toxins.

You can expect better working environment, more recovery of materials, less wastage, lower breakdowns, higher production, better product quality, lower cost of production and maintenance, longer life of the production equipment, reduction in rejections - in the nut shell - you get higher profits & lower costs AND you live longer and healthier!!

PRODUCTS OFFERED

Stand-alone Dust collectors for single or multiple number of dust generating machines/points.

Stand-alone dust collectors for wood-working machines - such as molders, panel saw, band saw, router, planer, etc.

Central Dust Collection systems for several dust generating machines/points.

Open/closed body bag filter systems with/without automatic motorized filter shaker.

Pulse-jet bag filter systems.

Pulse-jet cartridge filter systems

Micro dust collectors for very fine, toxic or precious materials - like gold, silver, etc.

Activated carbon filter based FUME extraction systems.

Weld fume exhaust systems - with fixed/mobile arms. Fume extraction systems for CNC Plasma cutting machines.

Wet scrubbers for electroplating fumes, furnace/boiler flue gases, high temperature emissions, etc.

Pressurizing equipment for dust proofing of a premises.

Centrifugal Blowers, Axial flow fans, etc.

Suction hoods with application specific designs

Ducts - aerodynamically designed for efficient conveying/transfer of dust laden air.

Specialized brushes and other cleaning accessories.

Central vacuum cleaning system.

Pneumatic Conveying systems for transferring / conveying powders and granular materials.
